Water Meter and Fire Hydrant Access

WATER
METER

Maintaining access to your water meter is an important responsibility of every resident. For 8 months of the year, the water meter is accessed by a city employee to read the water usage. When landscaping, weeds, shrubs, etc., grow over or are placed on the water meter, it becomes very difficult to find and read the meter. As a home owner, *you* are responsible for landscaping and keeping your meter accessible. If you can't see your water meter, neither can we! The cities' water meters are in constant need of maintenance and repair. Please locate your water meter and make sure it is accessible. If you are needing to raise or lower your meter, this should only be done after obtaining approval from the City's water department at Public Works.

Fire Hydrants are a critical part of providing emergency services to all of our residents in the case of a fire. When a fire hydrant is not accessible it is putting everyone at risk as it will delay our ability to respond quickly. We ask if you have a fire hydrant in your yard that you inspect and verify that there are no obstructions for 3 feet around all sides of the hydrant. The front of the hydrant should be completely open. Also, the hose connection ports should be a minimum of 18' above the grade around the hydrant. Please help in keeping our community safe by making our fire hydrants accessible.

If there are questions about water meters or fire hydrants, please contact the city's Public Works Department (801-785-2941).

Beautification Commission

Thanks to all who joined us at Manilla Creek Park. We are thrilled so many trees were planted for future generations to enjoy. Special appreciation to Carson Kirby for completing this assignment in conjunction with his Eagle project. 2018 marks our city's 22nd year qualifying as a **Tree City USA!** Spring is the perfect time to perform a water check on your property. More information at www.cwel.usu.edu/watercheck.

May 8th, join us at the library at 9 am as we beautify our community and learn together.

Here are 3 examples of “water wise” tips:

- Encourage water retention with compost coverage which also offers nutrients for your plants.
- Avoid wasting water by installing a spring-loaded shut-off nozzle on each garden hose.
- Use a slow-drip irrigation system to avoid over-watering and save money on your bill.
